

Automated Linear Washing and Filling Machine

This linear machine is designed for automated cleaning and filling. It features a multi-stage washing system followed by a precise filling mechanism, suitable for high-volume production.

Product Overview

Automated Linear Washing and Filling

This linear filling washing machine is designed for automated cleaning and filling processes. It features a multi-stage washing system for thorough cleaning, followed by a precise filling mechanism. Built with stainless steel for durability and hygiene, it is suitable for high-volume production lines in various industries.

Key Features

Operational Features

- Multi-stage washing system
- Precise filling mechanism
- Adjustable conveyor system
- Control panel for parameter adjustment
- Easy access for maintenance

Technical Specifications

Adjustable Parameters	Washing Time, Temperature, Filling Volume
-----------------------	---

Construction & Safety

Construction Material	Stainless Steel
Safety Features	Yes

Industry Suitability

Suitable Industries

Food and Beverage • Pharmaceuticals • Cosmetics
