Product Overview

Advanced Automated Floor Care

This automated robotic vacuum cleaner combines gyroscope navigation and SLAM algorithms for precise, autonomous cleaning. Designed for versatility, it handles various floor surfaces including long-hair carpets and overcomes thresholds with ease. The unit supports 24/7 scheduling to ensure consistent maintenance, while the multi-stage cleaning system ensures thorough debris removal.

Technical Specifications

Key Performance Metrics

14.8 V

Battery Voltage

2600 mAh

Battery Capacity

600 mL

Tank Capacity

Cleaning Navigation Modes

- Auto
- Zig-zag
- Spiral
- Edge

Features

In-Box Accessories

Remote Control • Charging Base

Cleaning System Components

2 Side Brushes, Interchangeable Middle Brush, Vacuum Inlet, Wet/Dry Mopping

Scheduling Support

Yes
