

Automated Small Item Cleaning Machine

This automated cleaning machine is designed for cleaning small items. It features a transparent lid, a control panel, and a compact, oval shape suitable for countertop use.

Product Overview

Efficient Automated Cleaning

This automated cleaning machine is engineered specifically for small items, offering a convenient solution for maintaining jewelry, eyeglasses, and precision parts. Its compact, oval-shaped design makes it ideal for countertop placement in professional or retail settings. Featuring a transparent lid, users can easily monitor the cleaning process in real-time, while the intuitive control panel ensures simple and reliable operation.
