Product Overview

Smart Tailgate Automation

This automated tailgate lift system provides a high-performance solution for seamless, hands-free vehicle access. Designed with dual-motor technology and an integrated Infineon motor driver, it ensures reliable and smooth operation. The system includes intelligent safety features such as obstruction detection and anti-pinch protection, making it an essential upgrade for modern automotive convenience.

Technical Specifications

Durability Ratings

- Waterproof
- Shockproof
- Aging resistant
- Car manufacturer standard

Motor Technology

Double motor drive • Infineon motor driver • Power protection

Operating Features

Remote Control, Button Control, Switch Control, Adjustable Height, Intelligent Anti-Pinch, Abnormal Alarm
