

Automated Toilet Soap Cold Stamping Machine

This automated cold stamping machine is engineered for efficient toilet soap production. It features a fully enclosed system with transparent safety doors for clear visibility and enhanced safety.

Overview

Professional Cold Stamping Solution

The XLD480 is an automated cold stamping machine engineered specifically for high-volume toilet soap manufacturing. Built with a durable aluminum frame, it features robotic handling and a fully enclosed system to ensure both precision and operator safety. This robust unit is designed for seamless integration into existing production lines, offering consistent quality for professional industrial environments.

Technical Specifications

System Integration

- Pneumatic connections
- Electrical connections

Construction

Durable aluminum frame

Safety Systems

Fully enclosed system, Transparent safety doors

Handling Mechanism

Advanced robotic arms for precise soap handling

Operations

Key Performance Benefits

High-volume efficiency • Consistent product quality • Enhanced operator safety

Control System

Integrated control panel with screen and tactile buttons
