Product Overview

Intelligent Irrigation Control

The Automated Watering Smart Valve provides professional-grade irrigation control for residential and commercial gardens. Utilizing BLE 4.0 technology, this device enables seamless scheduling via a mobile app, offering versatile programming options like calendar, interval, and seasonal cycles. Designed for efficiency, it features low-power consumption and specialized modes to prevent water waste and flooding.

Programming & Scheduling

Available Watering Cycles

- Calendar
- Even/Odd days
- Interval days
- Week cycle
- Month cycle
- Manual mode

Advanced Settings

EC Mode, Skip ODD 31, Skip Week Day, Season Differ

Connectivity & Power

Connection Technology

BLE 4.0

Battery Life

1 year

Features

Safety & Efficiency Features

- Low power protection to prevent water flooding
- One key sleep/awake
- Cloud-based history recording
- EC Interval watering for water conservation
