

Automatic Beverage Rinsing Filling Capping Machine

The automatic machine is designed for rinsing, filling, and capping beverages. It integrates bottle washing, precise filling, and secure sealing into a single, efficient process.

Product Overview

Integrated Beverage Processing Solution

This automatic three-in-one monoblock system is engineered for efficient rinsing, filling, and capping of fruit juices and various beverages. By integrating bottle washing, precise filling, and secure sealing into a single unified process, it streamlines production workflows. Designed for large-scale operations, the system prioritizes high hygiene standards and consistent operational speed.

Technical Specifications

System Type

Monoblock • 3-in-1

Suitable Products

- Fruit Juice
- Beverages

Model

RGCF32-32-10

Functions

Rinsing, Filling, Capping
