Overview

High-Efficiency Carbonated Filling Solution

This 3-in-1 automatic filling machine is engineered for the precise and efficient processing of carbonated beverages and soft drinks. Featuring a scientific, user-friendly design, it integrates rinsing, filling, and capping into a single, streamlined system. Built for reliability, the host utilizes advanced PLC programmable control technology and incorporates high-quality international components to ensure consistent performance and easy maintenance.

Technical Specifications

Machine Type

3-in-1 • Automatic

Control Technology

PLC Programmable Automatic Control

Conveying Structure

Hanging card bottle

Performance Data

Production Capacity (600ml bottles)

Model	Capacity (b/h)
RCGF14-12-5	3000
RCGF18-18-6	5000

Available Model Series

RCGF14-12-5, RCGF18-18-6, RCGF24-24-8, RCGF32-32-10, RCGF40-40-10
