Overview

Efficient Automatic Carton Sealing

This automatic carton sealing machine is designed for high-efficiency packaging lines, offering a reliable solution for consistent box sealing. It features an intelligent automatic system with photoelectric detection and wake-up functions to enable seamless, unmanned operation. Built with high-quality international electrical components, the machine ensures long-term stability and easy maintenance for demanding industrial environments.

Key Performance Metrics

Performance Highlights

1 Unmanned

Operation Mode

Technical Features

Automation & Intelligence

- Photoelectric detection system
- Automatic wake-up function
- Automatic alarm system
- Unmanned automatic operation capability

Sealing Quality

New structure side-sealing head designed for stability and deformation resistance.

Design & Construction

Machine Structure

- Firm overall machine structure
- Reliable guide rod positioning
- High-quality international brand electrical components
- Integrated roller conveyor system

Mobility & Setup

Casters for mobility, Adjustable leveling legs, Easy specification adjustment

Operational Capabilities

Application Versatility

- Adjustable height and width for various box sizes
- Customizable according to customer requirements
- Direct integration with existing production lines

Maintenance

Yes

Compliance

Certifications

CE
