

Automatic Container Capping Machine

This automatic capping machine is designed for high-speed and precise container closure. It features stainless steel construction, adjustable torque control, and compatibility with various cap sizes and container shapes.

Overview

High-Speed Automated Capping Solution

This automatic container capping machine is engineered for high-speed, precise closure across various container shapes and cap sizes. Built with robust stainless steel construction, it integrates advanced PLC automation and an intuitive HMI for seamless operation and monitoring. The system is designed to meet the rigorous demands of the pharmaceutical, food, beverage, and cosmetic industries.

Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC) with HMI
Safety Features	Transparent Enclosure, Safety Interlocks

Capabilities

Industry Applications

- Pharmaceutical
- Food & Beverage
- Cosmetics

Performance Features

High-Speed Operation • Adjustable Torque Control • Versatile Container Compatibility
