

# Automatic Control Seal-less Self-Priming Pump

This seal-less pump is designed for efficient and reliable fluid transfer. Its self-priming design ensures quick and easy start-up, even when located above the fluid source.

## Product Overview

### WFB Series Automatic Control Pump

The WFB series automatic control self-sucking pump is an advanced, seal-less fluid transfer solution designed for high efficiency and reliability. Its innovative seal-less construction eliminates leakage risks, significantly reducing maintenance needs and operational downtime. Equipped with automatic control capabilities, this unit is perfectly suited for unattended operation across diverse industrial, drainage, and irrigation applications.

## Performance Features

### Construction Style

Seal-less • Self-Priming • Automatic Control

### Key Operational Advantages

- Leakage-free operation
- Low maintenance requirements
- Quick and easy start-up
- Unattended operation capability

## Application Suitability

### Typical Applications

Industrial Fluid Handling, Drainage, Irrigation
