

Automatic Cup Dispenser

This automatic cup dispenser is designed for efficient dispensing of paper or plastic cups. It features a vertical cup storage tube, dispensing mechanism, and a collection tray.

Product Overview

High-Efficiency Cup Dispensing Solution

This automatic cup dispenser is engineered for high-volume environments, including food service operations and automated manufacturing lines. It features a robust vertical storage tube design that ensures consistent dispensing of both paper and plastic cups. The integrated dispensing mechanism and collection tray work together to streamline operations and maintain hygiene standards.

Technical Specifications

Compatible Cup Materials	Paper, Plastic
Design Type	Vertical Tube Dispenser

Features

Key Features

- Automatic dispensing mechanism
- Vertical storage configuration
- Integrated collection tray
- High-volume capacity

Application

Recommended Applications

Food Service • Manufacturing • Automated Packaging
