

Automatic Dumpling and Samosa Machine

This automatic machine is designed for efficient dumpling and samosa production. It automates the process of filling and shaping, ensuring consistent results.

Overview

High-Efficiency Commercial Dumpling Production

This automatic dumpling and samosa machine streamlines high-volume food production by automating the entire process from dough sheeting and filling to molding. Designed for commercial environments like hotels, restaurants, and frozen food factories, it ensures consistent quality that mimics hand-made textures while significantly reducing labor costs. The machine features adjustable settings for wrapper thickness and stuffing quantity, offering the versatility to produce a wide range of products including spring rolls, wontons, and samosas.

Technical Specifications

Power Requirements

220 V

Voltage

2.5 kW

Power

Model	FDAD500
Capacity	8000 pcs/h
Dimensions	1780 x 650 x 1400 mm
Weight	500 kg

Operational Details

Supported Product Weights

- 6-8g
- 12-14g
- 15-16g
- 18-20g
- 40-45g

Compatible Products	Dumplings, Samosas, Spring Rolls, Wontons, Hotpot Dumplings, Pearl Dumplings
---------------------	--

Construction & Design

Material Construction

SUS304 Stainless Steel • PU Conveyor

Design Features

- Double frequency conversion control
- Adjustable wrapper thickness
- Adjustable stuffing quantity
- Easy-to-clean compact structure
