Overview

Professional Edge Banding Precision

The WFB220Z is a high-performance automatic edge banding machine engineered for industrial woodworking applications. It provides a comprehensive solution for precision edge finishing, supporting materials such as PVC, ABS, veneer, and melamine. Designed with robust components and intuitive controls, this machine ensures efficient production and consistent quality for straight panel processing.

Technical Specifications

Workpiece Capacity

280 mm

Min. Length

90 mm

Min. Width

45 mm

Max. Thickness

Performance Metrics

- Feeding speed: 6m/min
- Trimming speed: 11000r/min
- Worktable dimensions: 2320x800mm

Electrical & Physical

Power Ratings

| Component | Power |
|---------------|-------|
| Total Power | 2350W |
| Feeding Motor | 250W |
| Impedance | 1250W |

Machine Dimensions
