Overview

Designed for Optimal Regional Performance

This automatic electric water pump is specifically engineered to meet the operational requirements of the Thai and Korean markets. Featuring a robust brass pump body and impeller, it delivers high efficiency and reliable pressure generation through centrifugal motion. Its compact design and economical operation make it an ideal solution for residential and light commercial water boosting applications.

Technical Specifications

Power Rating

0.4 HP

Horsepower

300 W

Power Consumption

Construction Materials

Component	Material
Impeller	Brass
Pump Body	Brass
Housing	Aluminum

Features

Key Features

- Automatic operation
- Peripheral impeller design
- High-pressure generation
- Compact size
- Centrifugal motion technology

Target Markets

Thailand, Korea
