Product Overview

Automatic Food Case Sealing Machine

This automatic case sealing machine is designed for high-efficiency packaging lines, offering both stand-alone operation and seamless integration into existing conveyor systems. It features automatic steering for precise upper and lower side tape sealing, ensuring consistent and secure packaging. Built with advanced technology and high-quality electronic and pneumatic components, this machine provides durable performance, smooth operation, and long-term stability for demanding industrial food packaging environments.

Operational Capabilities

Sealing Features

- Automatic steering
- Upper and lower side tape sealing
- Stand-alone or integrated line operation
- High-precision sealing performance

Customization

Adjustable Width, Adjustable Height, Customizable Specifications

Technical Construction

Build Quality

Durable Structure • High-Quality Pneumatic Components • High-Quality Electronic Components
