

Automatic Granule Packing Machine

This automatic packing machine is applicable for packing granules or particulate matter. It is used in industries such as chemistry, fertilizer, grain, food, feed, medicine, and construction materials.

Overview

High-Efficiency Granule Packaging

This completely automatic packing machine is engineered for high-speed, efficient packaging across the food, pharmaceutical, and chemical industries. It features a robust, multi-level platform design that ensures easy access for maintenance and continuous operation with minimal downtime. The system integrates advanced control technology to manage precise feeding, weighing, bag forming, sealing, and output conveyance.

System Components

Integrated Modules

- Automatic quantity-fixed balance
- Automatic bag-supply section
- Automatic bag-clamped section
- Automatic belt conveyor
- Automatic sewing / sealing machine
- Automatic bag-backwards section
- Electrical instrument control cabinet

Optional Add-ons

Air compressor

Performance

Suitable Industries

Food Industry • Pharmaceuticals • Chemical Industry
