

Automatic Hot Filling Machine for Juice and Tea

This automatic hot filling machine is designed for juice and tea products. It features a multi-station filling system, enclosed stainless steel construction, and adjustable parameters for various bottle sizes and filling volumes.

Overview

Professional Hot Filling Solution

This automatic hot filling machine is specifically engineered for the efficient processing of juice and tea products. It features a robust, enclosed stainless steel construction that ensures hygienic operation in demanding production environments. With its multi-station filling system and adjustable parameters, it provides precise filling capabilities for various bottle sizes and volumes, making it an ideal choice for high-volume production lines.

Technical Specifications

Filling System	Automatic Multi-Station
Construction Material	Stainless Steel
Suitable Applications	Juice, Tea, Hot Filling

Performance

Production Capability

High-Volume • Adjustable Parameters

Key Operational Features

- Multi-station filling system
- Adjustable for various bottle sizes
- Adjustable filling volumes
- Enclosed hygienic design
