Product Overview

High-Efficiency Hot Water Circulation

These automatic hot water circulator pumps are engineered for reliable performance in residential and light commercial heating and water systems. Designed with safety and durability in mind, they feature robust thermal protection and water-resistant construction. These units ensure efficient fluid movement while maintaining quiet operation, making them an ideal choice for modern plumbing installations.

Technical Specifications

Protection Rating

IP44

Power Supply

220V-50Hz

Thermal Class

TF 60

Pressure Rating

PN10

Noise Level

45 dB(A)

Performance Metrics

Model Performance

Model	Max Flow (Qmax)	Max Head (Hmax)	Power	Current
LPS 15-8.5Z	30 l/min	8.5 m	100 W	0.4 A
LPS 25-11Z	50 l/min	11 m	180 W	0.8 A

Certifications

Compliance & Standards

CE, ISO 9001, RoHS

Safety Information

Operating Warnings

- Never run the pump dry to prevent damage
- Ensure proper installation for residential and light commercial use
