

Automatic Ice Cream Cone Baking Machine

This is an ice cream cone baking machine. It has 37 baking plates and produces 3600-4000 cones per hour.

Product Overview

High-Efficiency Production

This automatic ice cream cone baking machine is engineered for industrial-scale manufacturing, offering high-capacity output and consistent quality. Built with stainless steel, it features precise temperature controls and an adjustable baking timer to ensure optimal texture and color for every cone. The system integrates a seamless batter dispensing mechanism and automated cone removal, making it a reliable solution for large-volume production environments.

Technical Specifications

Number of Baking Plates	37
Sheets per Plate	2

Performance

Hourly Production Capacity

4000 pcs/h
Max Output

Construction & Features

Material	Stainless Steel
Key Automation Features	Automatic Batter Dispensing, Automated Cone Removal, Precise Temperature Control, Adjustable Baking Time
