

Automatic Liquid Filling Machine

This automatic liquid filling machine is designed for precise and efficient bottling of various liquids. It features multiple filling heads for increased throughput and is constructed from stainless steel for durability.

Overview

Precision Liquid Bottling Solution

This automatic liquid filling machine is engineered for high-precision bottling applications, making it an ideal choice for laboratory, chemical, and food-grade packaging environments. Featuring a compact, durable stainless steel construction, the system offers versatile filling capabilities for various liquids, including oils, essential oils, and oral solutions. With an intuitive control system and high-speed filling valves, it ensures accurate volume dispensing while maintaining operational efficiency and safety.

Performance & Capacity

Production Capacity

- 350-500 bottles/hour
- 600-1000 bottles/hour
- 1000-1500 bottles/hour
- 1500-2200 bottles/hour
- 1600-2200 bottles/hour (5L capacity)
- 1800-2600 bottles/hour (5L capacity)

Technical Specifications

Key Features

Compact structure • Overload protection • High-precision valves • Easy maintenance • Corrosion resistant

Material

High-quality stainless steel

Supported Filling Technologies

Piston type, Magnetic pump, Flow meter, Linear type, Pneumatic

Compatibility

Suitable Liquids

- Cooking oil
- Essential oil
- Oral liquid
- Chemical liquid
- Vial liquids
- Paste products

Support & Warranty

Technical Support

- 24-hour email support
- Telephone support
- Operator and mechanic training
- Post-warranty maintenance services

Warranty

1-year warranty for the whole machine
