Overview

High-Efficiency Liquid Packaging Solution

This automatic liquid pouch filling and sealing machine is designed to streamline the packaging process for a wide range of liquids, including beverages, dairy products, and condiments. By integrating UV sterilization, precise bag forming, filling, and code printing, it ensures both hygiene and operational efficiency. Built for reliability, this machine offers simple operation and a low failure rate, making it an ideal choice for consistent, high-quality production.

Technical Capabilities

Integrated Features

- UV sterilization
- Automated bag forming
- Precision filling
- Code printing
- PLC-controlled operation

Compatible Liquids

Pure water, Milk, Soybean milk, Fruit juice, Beverages, Soy sauce, Vinegar, Wine

Construction & Design

Construction Material

Stainless Steel

Packaging Material

Single-layer PE film
