

Automatic Nut Cold Forming Machine

The automatic nut cold forming machine is designed for producing various kinds of nuts with high efficiency. It is a fully automated machine.

Overview

High-Efficiency Nut Production

The automatic nut cold forming machine is a high-efficiency solution designed for the mass production of various nut types. Featuring a horizontal multistage configuration, this equipment automates the entire process from feeding and cutting to precise cold heading. Its robust, energy-saving design ensures reliable positioning and easy maintenance, making it an ideal choice for manufacturing quality standard and irregularly shaped nuts.

Features

Operational Advantages

Horizontal Multistage, Fully Automatic, Energy Saving, Precise Positioning, Easy Maintenance

Technical Specifications

Model Specifications

Model	Product Range	Stroke	Productivity	Motor	Weight
Z41-4	M3-M4	80	160pcs/min	3.0kw	1200kg
Z41-6	M4-M6	85	120pcs/min	4kw	3600kg
Z41-8	M6-M8	108	100pcs/min	7.5kw	4500kg
Z41-10	M8-M10	108	90pcs/min	11kw	5500kg
Z41-12/4	M10-M12	125	85pcs/min	18.5kw	15500kg
Z41-16/4	M14-M16	150	70pcs/min	22kw	18000kg
Z41-20/4	M18-M20	165	63pcs/min	30kw	20000kg
