

Automatic PET Bottle Blowing Machine

This automatic PET bottle blowing machine is designed for high-volume production. It features a preform feeding system, heating unit, and a multi-cavity mold system for efficient bottle forming.

Overview

High-Efficiency PET Bottle Production

This automatic PET bottle blowing machine is engineered for high-volume manufacturing environments. It integrates a seamless preform feeding system, a precise heating unit, and a multi-cavity mold configuration to ensure consistent bottle forming. Operators can easily manage production quality through a dedicated control panel, allowing for fine-tuned adjustments to heating temperatures, blowing pressure, and cycle times.

Technical Specifications

Control Parameters

- Heating Temperature
- Blowing Pressure
- Cycle Time

Operation Mode

Automatic

Key Features

Preform Feeding System, Multi-Cavity Mold, Adjustable Blowing Pressure, Programmable Cycle Time

Production Capabilities

Production Efficiency

1 High-Volume

Production Type
