General Overview

High-Efficiency Water Bottling Solution

This automatic PET bottle water filling machine is engineered for high-speed production lines, offering reliable filling, capping, and labeling capabilities. Constructed with high-grade stainless steel to ensure optimal hygiene and durability, the machine is suitable for various bottle shapes and sizes. It features advanced programmable logic controllers (PLC) and a user-friendly touchscreen interface for precise control over filling volumes and operational efficiency.

Technical Specifications

Construction Material

Stainless Steel

Filling System

Rotary filling system with multiple filling heads

Control System

Programmable Logic Controller (PLC) with touchscreen interface

Key Features

Operational Capabilities

- Automatic bottle feeding and discharge
- Precise liquid level control
- Adjustable filling speed and volume
- High-speed production capacity

Safety & Compliance

Safety Mechanisms

Emergency Stop Buttons, Safety Interlocks
