

# Automatic Pie and Pastry Filling Machine

This automatic filling machine is designed for producing filled pastries and food products. It features adjustable pack speed and filling ratio, accommodating various product weights.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Filling Solution

This automatic filling machine is engineered for the precise production of small pies and filled pastries. It features a robust, stainless steel construction designed for durability and hygiene in food processing environments. With intelligent controls for adjustable filling ratios and production speed, this machine ensures consistent product quality and uniform shaping for high-volume output.

## Performance Metrics

### Production Speed

**20 pcs/min**

Minimum Speed

**80 pcs/min**

Maximum Speed

### Product Weight Range

20g - 200g

### Filling Ratio

1:2:3:5 / 2:1:2:5

## Technical Specifications

### Rated Voltage

380 V

### Rated Power

3.2 KW

## Physical Dimensions

### Dimensions (L x W x H)

123cm x 95cm x 163cm

### Machine Weight

388 kg

## Design Features

### Control Capabilities

- Adjustable filling volume
- Adjustable dough thickness
- Adjustable production speed
- Intelligent control panel

### Construction Features

Stainless Steel Construction, Dual Hopper System, Caster Wheels, Modular Design, Conveyor Belt System
