

Automatic Plastic Bag Making Machine

This high-speed machine is designed for efficient production of various plastic bags. It features automated film feeding, sealing, cutting, and stacking mechanisms.

Overview

High-Performance Bag Production

This high-speed automatic plastic bag making machine is engineered for the efficient production of a wide variety of plastic bags, including flat bags and vest bags. It integrates automated film feeding, sealing, cutting, and stacking mechanisms to streamline manufacturing workflows. With a programmable logic controller (PLC), operators can precisely adjust production parameters like bag dimensions and sealing temperature to meet specific project requirements.

Technical Features

Control System	Programmable Logic Controller (PLC)
Automation Functions	Film Feeding, Sealing, Cutting, Stacking

Production Capabilities

Compatible Bag Types

- Flat bags
- Vest bags
- Custom designs

Maintenance & Build

Build Quality

Durable Construction • Low Maintenance
