

Automatic Powder Filling Machine for Cans

This machine is designed for filling cans with powdered products. It is suitable for loose, non-sticky granular materials like coffee, sugar, and detergent powder.

Product Overview

Automatic Powder Filling Solution

This automatic powder filling machine is designed for the precise dispensing of loose and non-sticky granular products into cans or containers. It is highly versatile, supporting a wide range of applications including food products like coffee, sugar, and oatmeal, as well as detergents and desiccants. Engineered for efficiency, the machine features adjustable filling parameters to ensure accuracy and consistent output in various packaging environments.

Performance Metrics

Production Capacity

65 bags/min

Max Speed

30 bags/min

Min Speed

Measurement Range

30 ml

Technical Specifications

Power Requirements

1600 W

Total Power

50 Hz

Frequency

Power Supply Voltage

220V, 380V

Machine Dimensions

800 x 750 x 750 mm (L x W x H)

Machine Weight

180 kg

Packaging Capabilities

Compatible Packaging Materials

- Paper/PE
- Polyester/Aluminum Foil/PE
- Nylon/PE
- Tea filter paper

Suitable Products

Coffee • Sugar • Instant fruit drink • Soup mix • Condiments • Cereal • Oatmeal • Peanuts • Desiccant • Detergent powder
