Product Overview

High-Precision Powder Packaging Solution

This automatic quantitative packaging machine is engineered for the precise and efficient filling of various powder products. Featuring a robust stainless steel construction, it is optimized for hygiene and durability in food and pharmaceutical production environments. The system integrates automated screw feeding and volumetric filling mechanisms to ensure consistent dosing accuracy, while its compact, mobile design allows for seamless integration into existing production lines.

Technical Specifications

Material	Stainless Steel
Filling Type	Volumetric
Feeding System	Screw Conveyor
Safety Features	Emergency Stop, Protective Guarding
Mobility	Yes
