

# Automatic Pressure Boosting Water Pump

This automatic pressure boosting water pump is designed to automatically maintain water pressure in residential and light commercial applications. It features a compact design with an integrated pressure tank and control system.

## Product Overview

### Automatic Pressure Boosting Water Pump

This automatic pressure boosting water pump is engineered to maintain consistent water pressure in residential and light commercial environments. Featuring a compact, integrated design with a built-in pressure tank and control system, it ensures reliable operation for water sources such as wells, tanks, or municipal supplies. The unit is built for durability and ease of installation, providing an efficient solution for varied water flow requirements.

## Technical Specifications

### Suitable Applications

- Residential water pressure boosting
- Light commercial applications
- Well water systems
- Water tank supply
- Municipal water supply boosting

### Safety & Protection

Thermal Overload Protection

### Operational Features

Automatic Start/Stop, Thermal Overload Protection, Compact Design, Integrated Control System
