

Automatic Pressure Control Water Pump

This automatic pressure control water pump maintains consistent water pressure in residential and light commercial applications. Its pressure switch enables automatic start and stop functionality based on water demand.

Overview

Professional Water Pressure Solution

The KJ-750SA is an automatic pressure control pump engineered to maintain consistent water pressure for both residential and light commercial environments. Constructed with durable stainless steel, this unit offers excellent corrosion resistance and long-term reliability. It features an intelligent pressure switch system that automatically manages start and stop operations based on real-time water demand, making it an ideal choice for boosting pressure from wells, tanks, or municipal supplies.

Technical Specifications

Operation Mode

Automatic Start • Automatic Stop

Model Number

KJ-750SA

Construction Material

Stainless Steel

Applications

Suitable Applications

- Residential water boosting
- Light commercial water systems
- Well water extraction
- Tank water supply
- Municipal water supply boosting
