

Automatic Retractable Power Cable Reel

Automatic retractable cable reel designed for workshop or garage use. Features a durable housing, adjustable cable stop, and swivel mounting bracket for flexible positioning.

Product Overview

Professional Automatic Retractable Cable Reel

This automatic retractable power cable reel is designed to enhance efficiency and safety in demanding work environments such as assembly workshops and automotive service centers. Featuring a durable PP casing and an integrated hose guide system, it ensures neat retraction and protects the cable from premature wear. The unit includes a safety lock and auto-stop mechanism, providing a reliable power solution while maintaining a clean and organized workspace.
