

Automatic Rolling Machine

This automatic rolling machine is designed for high-volume production. It features automated feeding and discharge to maximize efficiency and ensure consistent and accurate rolling.

Overview

High-Efficiency Rolling Solution

The TJAW182/185 is a fully automatic rolling machine engineered for high-volume industrial production environments. It combines robust mechanical construction with precise control systems to deliver consistent, accurate rolling results across a wide range of materials. Designed to maximize operational efficiency, the unit features an integrated automated feeding and discharge system that significantly reduces the need for manual operator intervention.

Technical Specifications

Automation Level

Fully Automatic • Automated Feeding • Automated Discharge

Key Features

- Robust industrial construction
- Precise control systems
- Advanced control panel
- High-volume throughput capacity

Model Number

TJAW182/185
