

Automatic Rotary Liquid Filling Machine

This automatic rotary filling machine is designed for high-speed bottling and packaging applications. It features stainless steel construction, enclosed safety guarding, and a programmable logic controller (PLC) for precise control.

Overview

High-Speed Rotary Filling Solution

This automatic rotary liquid filling machine is engineered for high-efficiency bottling and packaging operations. Constructed with durable stainless steel and featuring enclosed safety guarding, it is built for reliability and operator protection. The integrated programmable logic controller (PLC) allows for precise adjustments of filling parameters, making it a versatile choice for industries ranging from pharmaceuticals to chemical processing.

Technical Specifications

Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Safety Features	Enclosed Guarding, Safety Interlocks

Application

Suitable Industries

- Beverages
- Chemicals
- Pharmaceuticals

Performance

Filling Mechanism

Automatic • Rotary
