

Automatic Round Bottle Label Applicator

This automatic labeling machine is designed for applying labels to round bottles with precision and efficiency. It features a conveyor system to transport bottles smoothly and a user-friendly control panel for easy adjustments.

Overview

High-Performance Labeling Solution

The LT-200 is a robust, stainless steel labeling machine engineered for high-efficiency application on round bottles. It features a reliable conveyor system and an advanced labeling head, ensuring consistent and precise results across various industries including food, beverage, and pharmaceuticals. Designed for ease of use, the control panel allows operators to quickly adjust critical parameters like speed, position, and pressure.

Suitable Industries

Food & Beverage, Pharmaceutical, Cosmetics

Performance Metrics

Labeling Speed

50 pcs/min
Minimum Speed

100 pcs/min
Maximum Speed

Labeling Accuracy

1 mm

Technical Specifications

Power Requirements

AC220V 50/60Hz (Single Phase)

Power Consumption

< 1KW

Label Compatibility

Supported Label Dimensions

Dimension	Range
Height	10 - 140 mm
Length	10 - 300 mm

Label Roll Specifications

- Max Outer Diameter: 350mm
- Inner Core Diameter: 76mm
