

Automatic Salad Dressing Bottle Label Ap- plicator

This automatic labeling machine is designed for applying labels to salad dressing bottles. It features a high-speed labeling system, precise label placement, and adjustable settings for various bottle sizes and label dimensions.

Product Overview

High-Efficiency Bottle Labeling

This automatic labeling system is engineered for precision application on salad dressing bottles within the food processing industry. The unit utilizes a high-speed conveyor system and intuitive controls to maintain consistent throughput and label accuracy. Constructed with durable stainless steel, it meets strict hygiene standards while accommodating various bottle sizes and label types, including wrap-around and tamper-evident designs.

Technical Specifications

Safety Features

- Emergency stop buttons
- Protective guarding
