

# Automatic Sauce Filling Machine

This automatic sauce filling machine is designed for dispensing precise amounts of sauce. It features a stainless steel construction and adjustable settings.

## Product Overview

### Industrial Sauce Filling Solution

This automatic sauce filling machine is specifically engineered for the food processing industry, utilizing a unique piston-type filling mechanism for precise measurement. It features a horizontal mixing structure that ensures consistency for viscous materials, including chili sauce, peanut butter, and jam. The system integrates photoelectric automatic control, making it highly efficient for continuous filling applications in professional packaging environments.

## Performance Specifications

### Filling Performance

**1 Piston**

Filling Method

**1 Photoelectric**

Control System

## Design & Application

### Key Features

- Horizontal mixing structure for optimal consistency
- Photoelectric automatic control system
- Piston-type filling form
- Stainless steel construction
- Mobile design on industrial wheels

### Suitable Fill Materials

Chili Sauce, Bean Paste, Peanut Butter, Sesame, Jam, Butter

## Compliance

### Industry Standards

Food-Grade Materials
