Product Overview

High-Efficiency Automatic Capping Solution

This automatic screw capping machine is engineered for reliability and precision in bottling applications. Featuring an advanced structure with speed regulation capabilities, it ensures stable and safe operation for various production requirements. Designed for high productivity, it serves as an ideal solution for small to medium-sized beverage and canned product facilities.

Technical Specifications

Performance Metrics

2000 P/H

Production Capacity

0.75 kW

Main Power

1 count

Working Heads

Machine Dimensions

1000 x 900 x 1700 mm

Operational Features

Key Operational Advantages

- Advanced speed regulation system
- Stable and reliable operational performance
- Maintenance-friendly design
- Safety-focused construction

Target Industries

Beverage, Canned Goods, Small-to-Medium Production
