Overview

High-Efficiency Tablet Packaging

This vertical form-fill-seal (VFFS) machine is engineered for the precise packaging of tablets and granular products into custom-shaped sachets. Featuring robust stainless steel construction, it ensures hygiene and durability for pharmaceutical, food, and chemical applications. The system integrates advanced PLC control and automatic weighing to deliver high-speed, continuous production with consistent dosing accuracy.

Technical Specifications

Machine Type	Vertical Form-Fill-Seal (VFFS)
Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
User Interface	Touch Screen

Safety Features

Safety Features	Emergency Stop, Interlocked Safety Guards
-----------------	---

Capabilities

Compatible Products

- Tablets
- Capsules
- Granular Products

Suitable Industries

Pharmaceutical • Food • Chemical
