Overview

High-Efficiency Industrial Cleaning

The P24A Automatic Tunnel Dishwasher is a high-capacity cleaning solution engineered for demanding industrial environments. Featuring a continuous tunnel-type design, this machine streamlines high-volume cleaning processes for food processing plants and manufacturing facilities. Its robust stainless steel construction ensures long-term durability, hygiene, and resistance to corrosion in heavy-duty settings.

Technical Specifications

Model Number	P24A
Total Power	26.01 KW
Electrical Requirements	380V/50HZ
Water Consumption	680 L/H
Dimensions (W*D*H)	600*840*2040mm

Key Features

Operational Capabilities

- Pre-wash stage
- Main wash stage
- Rinsing stage
- Drying zone
- High-pressure spray nozzles
- Integrated filtration system

Control System

- Digital control panel
- Adjustable wash parameters
- Emergency stop safety features

Design & Construction

Stainless Steel Construction, Tunnel-Type Design, Mobile on Wheels, Continuous Conveyor System
