Overview

Integrated Water Bottling Solution

This automatic water bottle filling machine provides a comprehensive solution for mineral and pure water production. By combining bottle washing, filling, and capping into a single, highly automated unit, it significantly streamlines the packaging process. Designed with advanced technology and featuring a robust stainless steel construction, it ensures both operational efficiency and strict adherence to hygiene standards.

Technical Specifications

Model	CGF8-8-3
Capacity	2000 bph
Motor Power	2.2 kW

Features

Contact Parts Material

Stainless Steel 304

Automation Features

- Automatic stop when no bottles are detected
- High degree of automation
- Easy operation and maintenance
- Labor cost reduction

Integrated Functions	Bottle Washing, Filling, Capping
Control System	PLC with Touch-Screen Interface
