

Automatic Water Bottling Machine

This automatic water bottling machine integrates rinsing, filling, and capping functions into a single unit for hygienic and efficient production. The machine is constructed with stainless steel and features a precise filling mechanism to maintain consistent fill levels and minimize waste.

Overview

High-Efficiency Water Bottling Solution

This automatic water bottling machine integrates rinsing, filling, and capping into a single, high-speed unit. Designed with advanced gravity filling and magnetic torque capping technology, it ensures accurate, steady, and damage-free operation. Built with high-quality stainless steel and international-standard components, it offers durable and reliable performance for diverse production needs.

Technical Features

Filling System	Advanced gravity filling
Capping System	Magnetic torque with stepless power adjustment
Control Interfaces	HMI Touch-Screen, PLC Program Control

Construction

Contact Surfaces	High-quality stainless steel
Bottle Handling Design	Suspending bottle-neck clamping

Operational Capabilities

Operational Metrics

1 unit

Integrated Functions

International Electrical Partners

- Mitsubishi
- Omron
