

Automatic Water Pressure Booster Pump

The automatic water pressure booster pump is designed to automatically boost water pressure for residential and light commercial applications. It provides consistent water pressure for showers, faucets, and appliances.

Overview

Automatic Water Pressure Booster Pump

This automatic water pressure booster pump is designed to enhance water pressure for both residential and light commercial applications. It offers a durable construction and automatic operation, ensuring consistent water pressure for showers, faucets, and various appliances. Whether used with well water or municipal systems, this pump improves flow and performance, while the integrated pressure tank minimizes pump cycling.

Technical Specifications

Compatible Water Sources

- Well water systems
- Municipal water systems

Suitable Applications

Residential, Light Commercial, Homes, Cabins, Small Businesses

Features

Key Features

Automatic Operation • Integrated Pressure Tank • Durable Construction • Pressure Switch Control
