Product Overview

Professional Water Pressure Solution

The QB/JET Automatic Water Pressure System is a robust solution designed to maintain consistent water flow for domestic and light industrial applications. Featuring a self-priming centrifugal pump paired with a high-capacity pressure tank, this system minimizes pump cycling while ensuring a steady, reliable water supply. Engineered for durability, it includes a cast iron pump housing, integrated pressure gauge, and automatic switch for seamless, on-demand operation.

Technical Specifications

Pump Type	Self-priming centrifugal
Pump Housing Material	Cast Iron
Application Fluid	Clean water, Non-abrasive liquids, Chemically non-aggressive

Key Features

Integrated Components

- Electric motor
- Centrifugal pump
- Pressure tank
- Pressure gauge
- Automatic pressure switch
- Flexible connection pipe

Performance Benefits

Automatic Operation • Steady Water Supply • Reduced Cycling • Easy Installation
