

Automobile Air Conditioning Condenser

This automobile air conditioning condenser is designed for efficient heat exchange. It is constructed with durable materials to ensure longevity and reliable performance in automotive air conditioning systems.

ADDITIONAL IMAGES

Overview

High-Efficiency Automotive Condenser

This automobile air conditioning condenser is engineered for superior heat exchange and cooling performance. Featuring a parallel flow design with aluminum tubes and fins, it maximizes surface area for optimal thermal management. Built with durable materials and precise fittings, it ensures long-lasting reliability and resistance to environmental corrosion in various vehicle applications.

Key Metrics

Core Dimensions

627 mm
Core Width

425 mm
Core Height

16 mm
Core Thickness

Vehicle Compatibility

Compatible Vehicles

Model	Engine/Variant	Year Range
Nissan Rogue	2.5L I4	2008-2013
Nissan X-Trail (T31)	2.0 DCI	2007-Present

Technical Identifiers

Reference Numbers

- OEM: 92100JG000
- DPI: 3680
- NISSENS: 3750
- TS No: 88-73030

Design & Construction

Certifications

CCC

Construction Features

Parallel Flow Design, Aluminum Tubes, High-Density Fins, Integrated Receiver Drier, Corrosion Resistant

Logistics

Packaging Dimensions

730 x 42 x 471 mm
