Product Overview

High-Performance Turbocharger

This HE200WG turbocharger is engineered to significantly enhance automobile engine performance and efficiency. By forcing a greater volume of air into the combustion chamber, it delivers increased power output and improved throttle response. Designed for durability and reliability, this unit is an ideal choice for both OEM replacements and engine performance upgrades.

Identification

Model	HE200WG
Part Number	3773121
OEM Number	3773122

Performance

Key Benefits

- Increased power output
- Improved throttle response
- Reduced emissions
- Enhanced engine efficiency

Application

Automotive • OEM Replacement • Performance Upgrade
