

Automobile Steering Side Rod Assembly

Side rod assembly designed for automobile steering systems. This component connects the steering gearbox to the steering knuckles, enabling the wheels to turn.

Product Overview

Steering Side Rod Assembly

This steering side rod assembly is a critical component for automotive steering systems, engineered to connect the steering gearbox to the steering knuckles. It facilitates precise wheel turning in direct response to driver input, ensuring consistent steering responsiveness and vehicle control. Designed for high durability and reliability, this assembly is a direct fit for a variety of classic vehicle models.

Features

Precision-engineered, Steering linkage, Durable construction, Responsive performance

Compatibility

Compatible Vehicles

- TOYOTA CARINA 1972-1973
- TOYOTA CELICA 1971-1981
- TOYOTA COROLLA 1975-1982
- TOYOTA CORONA 1979-1982
