

Automotive Air Conditioning Compressor

This air conditioning compressor is designed for automotive use. It utilizes R134a refrigerant and RS20 lubricant.

Product Overview

Automotive Air Conditioning Compressor

This high-performance automotive air conditioning compressor is engineered for reliability in vehicle cooling systems. It is specifically designed to operate with R134a refrigerant, ensuring compatibility with standard automotive climate control requirements. Built for durability, this unit provides consistent output to maintain optimal cabin temperatures in various driving conditions.

Technical Specifications

Refrigerant

R134a

Model Number

JSS-96H1Z1

Lubricant

RS20

Safety Note

Not for consumption (lubricant RS20)
