

Automotive Airbag Reset Tool for Audi and VW

This tool resets airbags in Audi and VW vehicles. It connects through the car OBD II connector and can erase airbag sensor crash data or fault memory.

Product Overview

Standalone Airbag Diagnostic Solution

This specialized automotive tool is designed for the efficient management of airbag systems in Audi and Volkswagen vehicles. It operates as a standalone unit, connecting directly to the vehicle's OBD II port without the need for an external computer. The device allows technicians to quickly clear airbag crash data and fault memory, streamlining the repair process for airbag control modules.

Technical Operation

Interface Controls

- Red Button: Erase airbag crash data
- Yellow Button: Erase airbag fault memory/errors
- Yellow LED: Flashing indicates processing
- Green LED: Operation successful
- Red LED: Operation failed

Connection Interface

OBD II

Compatibility & Support

Vehicle System Support
