

# Automotive Belt Tensioner

This belt tensioner maintains proper tension on the engine's drive belt. It features a durable pulley with a spring-loaded arm for automatic tension adjustment.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Automotive Belt Tensioner

This automotive belt tensioner is engineered to maintain consistent, optimal tension on engine drive belts, ensuring reliable power transfer to critical components such as the alternator, power steering pump, and air conditioning compressor. Designed for durability, the assembly features a high-quality pulley and a spring-loaded arm that automatically adjusts to belt wear, preventing slippage and reducing noise. It is compatible with a wide range of vehicle models, making it an essential component for maintaining engine longevity and performance.

## Compatibility & Part Numbers

### Reference Part Numbers

- 5751.20
- 5751.47
- 5751.61
- 5751.A2
- 5751.C8
- 5751.97
- 5751.60
- 96289902
- 96420067
- 96362074
- 9652046680
- 9649675880
- 96366405

### Compatible Vehicle Models

206, 306, 307, 405, 406, 407, 605, 607, 806, 807, Bepper

## Technical Features

### Key Features

Automatic Tension Adjustment • Heavy-Duty Pulley • Spring-Loaded Arm • Engineered for Longevity
